Prototype

Version 1.0

The screenshot shows a mobile application interface for a shopping cart. The top navigation bar is blue with a white back arrow and the text 'Cart'. On the right side of the header is a circular profile picture of a person. The main content area has a light blue background and contains three identical white rounded rectangular cards. Each card displays a square image of a 'Spicy Chicken Pizza' with various toppings. To the right of the image, the text 'Spicy Chicken Pizza' is followed by 'LKR: 1000'. Below the price, there is a green button with a white minus sign and the number '1', and a red button with the text 'Update'. At the bottom of the screen, the word 'Total' is in red, followed by 'LKR: 3000'. Below this, the text 'Delivery option' is in bold. There are two options: 'At your home' with a grey circle and a house icon, and 'I'll pick it up' with a grey circle and a person icon. The 'At your home' option is selected. At the very bottom is a large red button with the text 'Checkout' in white.

Product Area: Mobile Application (Domino's Pizza Mobile Application SL)

User Type: Undergraduate

Duration: Approx. 12 minutes

Good evening, everyone, This session is hosted to get know the ideas of redesigned user interface of Dominos' Pizza mobile application in Sri Lanka.	Welcome
Today here we are with Ms. Kavinya Perera who shared her experience of dominos' pizza mobile application back then. We are warmly welcome you and thank you for joining with us.	Introductions, Thanks
Today what we are going to do is that we will show you redesigned user interface of mobile application and get your feedback. Feel free to tell us if there's something you like, dislike, if you're confused, etc.	Explain the session – how it will work (left side of this page)
Ok, Let's get started.	
This is the redesigned splash screen of the application. Are you like it or? any feedback? Ok, let's move to next screen. This is the redesigned screen of Sign-up page. Are you ok with this interface? well, Move on. Next is Log In page. Is it look good and happy with this interface? If you remember in real application menu page is little bit complicated. what do you think about this interface. Fine, move to details page. This is the screen of redesigned of More Details page. Are you happy with?	Questions

<p>This interface since real application interface is little bit complex?</p> <p>Next is Cart page. Are you ok with this interface rather than having an unwanted detail in same page?</p> <p>Hand over to Perusha to continue.</p> <p>So, this the newly design Delivery page. So, for this there's no separate for this page in previous version. What do you think about this?</p> <p>Let's move to Checkout page. Are you happy with this page?</p> <p>After the checkout page you can navigate to the payment page. Do you have any suggestions?</p> <p>So, the ordering process is over in this payment interface. Do you have any suggestions for this flow ending?</p> <p>There is a separate page called Offers. What do you think about this page?</p> <p>Next move to the My Profile page. In the previous version there's no separate page for the profile. In our version we added separate page for the profile. Are you happy with this interface?</p> <p>Then, you can navigate to the addresses page by clicking 'My Addresses' button. In this page you can edit and delete addresses details. What do think about this interface?</p> <p>Next page is to add the new address. How about this interface?</p>	
<p>Ok. Thank you for joining with us and give your valuable suggestions and feedback.</p> <p>Have a nice day.</p>	<p>Thanking.</p>
